Design Professionals

CONTINUING EDUCATION SEMINARS ||
SPRING 2018 SCHEDULE
CONTINUING EDUCATION SEMINARS

The Center for Government Services (CGS) at Rutgers University assists the Division of Codes and Standards in the New Jersey Department of Community Affairs in offering more than 325 seminars required by law for Construction Code Enforcement Officials, Technical Assistants, and Multiple Dwelling Inspectors.

The mission of the Continuing Education Program is to further the professional development of code enforcement personnel by providing quality educational offerings through continuing education programs for licensed inspectors and their support staff. Together, our state and local governments are committed to protecting the health, safety, and welfare of all people throughout our communities to ensure that New Jersey continues to be a safe and desirable place to live.

HOW TO USE THIS BROCHURE
For your convenience, we have included a grid of the seminars organized by the course number. It indicates duplicate and reciprocal credits, as well as if the seminar is available online. Credit is applicable only to those areas marked in the grid or noted in the course description. If you are unsure of the credit available and its applicability to your license, please confirm with the DCA prior to registering. The table also contains the page number where you can find full seminar descriptions along with dates and locations. The course descriptions are organized alphabetically by the seminar name.

Facilities Information ................................................... 42

REGISTRATION INFORMATION
If your code enforcement license expires on July 31, 2018, please keep in mind that the spring semester runs from March through June, and you must complete your continuing education requirements during this time period. All continuing education requirements must be met within the regularly scheduled program.

Make sure you are selecting seminars that meet CEU requirements for your license.

Seminar Limits: Unless your license expires on July 31, 2018, you will be limited to either two seminars or one per subcode in which you hold a license (whichever is greater). This will give everyone an equal opportunity to register. If you are interested in registering for additional seminars, you should call one week before the seminar start date.

Unlicensed Registrants: Architects, engineers, builders, and other unlicensed interested parties may attend seminars for a fee of $125 for one-day seminars and $250 for two-day seminars. Those interested parties who wish to participate may call anytime after the third week of registration.
Registration Procedure:

1. Select a first and second choice from the seminars offered. In case your first choice is filled, you can register for your alternate selection. The DCA staff person responding to your email or phone call can answer questions about the fulfillment of your education requirement for the current licensing cycle.

2. Email the DCA Education Unit at education.unit@dca.nj.gov. Be sure you indicate your full name, your code enforcement license number, the course code, location and date of each seminar you have selected. Please note first and second choices. You will receive an emailed confirmation of your registration.

3. You may also call the DCA Education Unit at 609-984-7820 between the hours of 9:00 AM and 4:00 PM. Be sure to have the following information ready: your code enforcement license number, the course code, location and date of each seminar you have selected.

Confirmation: Confirmations are mailed approximately two weeks before the date of each seminar. If you have not received the confirmation one week prior to the seminar, call the Education Unit at 609-984-7820 to ensure that your name is on the roster. Walk-in registrations are not permitted.

Duplicate Credit: You have the option of receiving duplicate credit for certain seminars designated with a D prefix. At sign in, you will be asked to indicate whether or not you wish to receive duplicate credit.

Reciprocal Credit: The Division of Fire Safety will award reciprocal credit for those seminars marked with . In order to receive reciprocal credit, you must provide your Division of Fire Safety certification number at sign in. The Board of Electrical Contractors will award reciprocal credit for those seminars marked with ☼. For some electrical seminars, the approval of the Board of Electrical Contractors is currently pending. Online GoToTraining electrical seminars are not approved by the Board for reciprocal credit. In order to receive reciprocal credit, you must provide a picture ID and your current contractor’s license at sign in.

Online Seminars: Seminars marked with ☀ are available online. Online GoToTraining seminars are identical in content and timing to our in person training programs (5 hours, 0.5 CEUs). Registration for the full day seminars will begin at 8:00 AM; the seminar instruction will begin at 8:30 AM and conclude no later than 4:00 PM. Evening sessions are scheduled between 6:30 PM and 9:00 PM with registration starting at 6:00 PM. Be sure that you can allot that entire period of time to attend. You MUST log into GoToTraining at least ½ hour prior to start.

All seminars are conducted entirely over the internet. You MUST have operating microphone and speakers on your computer to receive credit (no telephone participants), as you will not only need the speakers to hear the presentation, but also will have the opportunity to ask questions of the instructor and have them answered live as with any of our other seminars. To register for the online seminars and for more information, please visit: http://tiny.cc/UCConline

Save the Date: Seminars marked with asterisks (*) will also be offered at the 2018 Building Safety Conference in Atlantic City on May 2, 3, 4. Please plan your spring semester accordingly.

Special Inspector Certifications: Certified special inspectors should register only for specific seminars meeting the continuing education requirements for their area of certification. Courses applicable to and counting towards renewal of a Structural Welding and/or Steel Bolting special inspector certification are identified by “SS” as noted in the grid. Likewise, Structural Concrete and Masonry special inspector seminars can be identified by “SC,” EIFS special inspector courses will be noted as “SE,” and, finally, Spray-Applied Fireproofing special inspector courses are denoted by “SF” in the grid. They are also specifically identified in the course descriptions.

Cancellation Policy: If you are unable to attend a seminar for which you registered, you must call the Education Unit to cancel your reservation as soon as possible. Failure to inform of your cancellation may result in future registrations being restricted.

Digital/Electronic Devices: The use of cell phones is disruptive in seminars. Digital/electronic devices are permitted only if you are using them for class work.

Seminar Times: All seminars begin at 8:30 a.m. and conclude by 4 p.m. You must arrive before 9 a.m. in order to be admitted to the seminar. Students who miss a substantial portion of a seminar or who leave early, for any reason, will not receive credit. Please bring your seminar confirmation card and UCC/HMD licenses with you to the seminar.

Dress Code: All seminar participants should follow a business-casual dress code. Many of the conference facilities will not allow students wearing shorts and flip-flops on their premises. Violating a facility dress code may be cause for dismissal from the course.

ICC Preferred Provider Program: The DCA/RU educational program is now an approved preferred provider with the International Code Council (ICC). The goal of the program is to support our licensees and other interested parties who also maintain ICC certifications. The use of ICC or Preferred Provider training is required as a condition of all ICC certification renewals. Our participation in the program will mean that our courses will be approved to also meet the ICC certification renewal requirements. Program participants need not do anything different: our seminar completion certificates will include our provider number (1091) as well as the ICC course number associated with the approval. If you have any questions regarding the Preferred Provider Program, please visit iccsafe.org.

Directions: For directions to the seminars, please visit www.cgs.rutgers.edu/codeenforcement or http://tiny.cc/dca-directions

Please note that GPS and online maps might provide inaccurate directions. We strongly recommend that you visit one of the links above and follow the provided directions.

2014 NATIONAL ELECTRICAL CODE UPDATE AND ANALYSIS OF CHANGES AND REVIEW TO ARTICLES 500-516 (CLASSIFIED) HAZARDOUS LOCATIONS AND WHAT TO LOOK FOR IN AN INSPECTION
Instructor: Stephen Norako
Credit: electrical
This seminar provides the inspectors with a clear understanding of NEC 2014, including updates, changes and providing useful tools to use back on the job. Articles 500-516 significant changes include reorganization, wiring methods, process instrument and sealing requirements. To assist the inspector, this seminar covers the administration and enforcement activities as per N.J.A.C. 5:23 Electrical Subcode (a) (1) by reviewing NEC Articles 500-516 changes, identifying key installation pitfalls common to these locations. 0.5 CEU
Thurs, Apr 19 - Fire-Rescue Station 221, Evesham
Tues, May 22 - NJ Sports & Exposition Authority, Environment Center, Lyndhurst

D248
2015 IBC ESSENTIALS
Instructor: James Quigley, International Code Council
Credit: building, fire protection
This seminar examines basic concepts of the 2015 International Building Code. It provides a basis for the correct use and application of the code and builds on an understanding of intent of the code through practice with real-world examples. 0.5 CEU
Wed, May 23 - RWJ Conference Center, Hamilton
Wed, June 13 - Holiday Inn, Clinton

D280
2015 IBC PENETRATIONS, JOINTS AND DAMPERS*
Instructor: James Quigley, International Code Council
Credit: building, fire protection
This course discusses the details and requirements for dampers, penetration firestops and joint systems. The topics include the concepts, testing, installation, and citations within the code. The IBC uses fire resistive rated assemblies to protect the building’s structural system, to separate adjacent spaces within the building that are not compatible, or to separate and protect adjacent buildings. In addition, the code uses smoke resistant assemblies to limit the spread of smoke within a building and the dangers it would create for the occupants. Any opening or penetration within the rated assemblies has the potential to reduce the assembly’s performance. This course focuses on the protection provided by dampers, penetration firestops and joint systems to ensure the building and occupants are safe. 0.5 CEU
Wed, Apr 25 - Camden Cty Regional Emergency Training Center, Blackwood
Thurs, June 14 - Holiday Inn, Clinton

D294
2015 ICC COMMERCIAL COOKING SYSTEMS
Instructor: James Quigley, International Code Council
Credit: building, fire protection, mechanical
This seminar addresses the applicable requirements in the 2015 International Mechanical Code, 2015 International Fire Code, 2015 International Fuel Gas Code, 2015 International Building Code and 2015 International Energy Conservation Code as applicable to commercial cooking systems. It emphasizes commercial hood and duct construction, when commercial hoods are required, what type of hood is required for different cooking appliances, and air movement requirements. 0.5 CEU

2015 IECC ESSENTIALS AND ASHRAE 90.1
Instructor: International Code Council
Credit: building, electrical, plumbing
This seminar enables participants to better understand and apply the critical concepts of the 2015 International Energy Conservation Code and relevant provisions within ASHRAE 90.1. These concepts provide a basis for the correct use of the code in the design, plan review, inspection, and analysis of projects. Participants will discuss how to apply the code in clear-cut situations to build their understanding of the intent of the code when asked to make code compliance decisions to increase the efficient use of energy in the construction of new buildings and alterations to existing buildings. 0.5 CEU
Wed, Apr 25 - Camden Cty Regional Emergency Training Center, Blackwood
Thurs, June 14 - Holiday Inn, Clinton
D295
2015 IFGC DESIGN, INSTALLATION AND INSPECTION PRINCIPLES
Instructor: James Quigley, International Code Council
Credit: building, fire protection, plumbing, mechanical
This seminar discusses critical concepts of the 2015 International Fuel Gas Code. It provides a basis for the correct use of the code in the design, plan review, inspection, and analysis of projects. In addition, students will gain a clear understanding of the requirements identified by basic code provisions, tables and topics. Seminar information allows code users to apply the code in clear-cut situations and builds their understanding of the intent of the code when asked to make code compliance decisions. 0.5 CEU
Wed, Apr 04 - Grand Hotel, Cape May
Tues, Apr 17 - Holiday Inn, Clinton

D306
2015 IMC DESIGN, INSTALLATION AND INSPECTION PRINCIPLES
Instructor: James Quigley, International Code Council
Credit: building, fire protection, plumbing, mechanical
This seminar highlights key provisions of the 2015 International Mechanical Code and provides practice in applying key requirements. It reinforces learning by supplying immediate feedback and clarification. It walks participants through the content outline of the code book and describes key sections. 0.5 CEU
Wed, March 28 - Holiday Inn, Budd Lake
Wed, June 20 - Ocean Cty Fire and EMS Training Center, Waretown

D291
2015 IMC INSTALLATION AND VENTING REQUIREMENTS FOR CLOTHES DRYERS AND CHIMNEYS
Instructor: IAPMO
Credit: building, fire protection, plumbing, mechanical
This seminar focuses on the International Mechanical Code provisions concerning the proper installation and venting of chimneys and clothes dryers. Along with the general provisions for these installations, this seminar covers venting specifications, sizing of venting systems, construction, ducts, and how to properly use the numerous tables. Upon completion of this seminar, participants will be able to locate and enforce the code provisions pertaining to chimneys and clothes dryers, as well as describe the basic concepts and requirements for their proper installation and venting. 0.5 CEU
Tues, Apr 03 - Bergen Cty Law and Public Safety Institute, Mahwah
Thurs, June 14 - Atlantic Cape Community College, Rutgers Building Q, Mays Landing

D311
NEW
2015 IMC SPECIAL TOPICS: ACCESS AND PROTECTION OF EQUIPMENT AND INSTALLATION OF SPECIFIC APPLIANCES
Instructor: IAPMO
Credit: building, fire protection, plumbing, mechanical
This seminar identifies access requirements to get to and safely service appliances on roofs with emphasis on ladder, platform, and roof hatch requirements. Other topics include access to equipment in attics, crawlspaces and other locations along with other special requirements such as walkways, service platforms, ceiling heights, lighting and certain energy code issues to watch for. In addition, participants will walk away with a better understanding of the proper installation requirements per the 2015 IMC and other related code provisions that guide these installations. 0.5 CEU
Tues, Apr 17 - Fire-Rescue Station 221, Evesham
Tues, May 15 - Executive Inn, Fairfield

2015 IRC COMPLIANCE - NJ EDITION
Instructor: Dennis Pino, Nick Fabiano
Credit: building, fire protection
This seminar allows participants to experience a new interactive approach to IRC instruction with real-life code enforcement scenarios, UCC integration, high quality graphics and custom agency driven icons. This seminar helps to bridge the gap between the 2009 and 2015 New Jersey IRC code editions. In addition, detailed subcode responsibilities regarding plan review and inspection are provided for every code section presented. Students will review key changes, commentary, referenced standards and much more. 0.5 CEU
Fri, May 11 - Holiday Inn, Budd Lake
Fri, June 22 - Ocean Cty Fire and EMS Training Center, Waretown

D252
2015 IRC ESSENTIALS
Instructor: James Quigley, International Code Council
Credit: building, fire protection
This seminar examines basic concepts of the 2015 International Residential Code. It provides a basis for the correct use and application of the code and builds on an understanding of the code’s intent through practice with real-world examples. 0.5 CEU
Tues, Apr 10 - Holiday Inn, Clark
Tues, May 15 - Atlantic Cape Community College, Rutgers Building Q, Mays Landing

ADMINISTRATIVE TOOL KIT FOR THE UCC
Instructor: Richard Osworth
Credit: administrative
In today’s world, local officials are required to multi task and to do more with less. This seminar reviews current regulations and methodologies to assist the local official with establishing a comprehensive management tool kit. The specific tools are personnel management, cost analysis, staffing allocations, working within different organizations, interlocal cooperation, and conflict of interest and ethics. Seminar participants will build an organizational chart, develop job descriptions, conduct personnel evaluations, and evaluate staffing requirements for a medium sized local enforcing agency. The basic tools of these tasks will be presented and discussed with samples based on current laws and regulations. 0.5 CEU

Thurs, May 10 - Clarion, Toms River
Fri, June 22 - The Inn at Lambertville Station, Lambertville

D157
ADVANCED BARRIER FREE 2018*
Instructor: Jack Boekhout Consulting, LLC
Credit: administrative, building
Students will be made aware of some of the fine points of Barrier Free compliance. Students will have an opportunity to experience the problems associated with the operation of a wheelchair and crutches. The students will test the changes in level, maneuvering problems and compare them to the code text. Active participation in a wheelchair workshop is expected from all participants. 0.5 CEU

Wed, May 16 - Rutgers Continuing Education Center at Atrium, Somerset
Thurs, May 24 - RWJ Conference Center, Hamilton

D009
BARRIER FREE SUBCODE 2018
Instructor: Jack Boekhout Consulting, LLC
Credit: administrative, building
ONE TIME mandatory requirement for Building Inspectors. This course reviews each of the amendments to the NJ Barrier Free Subcode, including the revisions to access requirements for multi-family residences and the C.O.A.H. (now known as Low and Moderate Income Housing) requirements for townhouses. Provisions of the revised Barrier Free Subcode that provide compliance with Federal Americans with Disabilities Act regulations are also covered. Emphasis is placed on ensuring that code officials understand where their enforcement authority lies and also on showing where in Subchapter 7, IBC Chapter 11 and ICC/ANSI A117.1 standard the provisions and requirements of the Barrier Free Subcode can be found, including the Low and Moderate Income Housing rules. 0.5 CEU

Tues, March 27 - Monmouth Cty Fire Academy, Freehold

D307
NEW BUILDING SUBCODE ASSORTMENT, INCLUDES SPECIAL AMUSEMENT USES, FARM BUILDINGS, MEMBRANE STRUCTURES, DECK REVIEWS, SNOW AND ARCHAIC FIRE RATINGS*
Instructor: Jack Boekhout Consulting, LLC
Credit: building, fire protection
More and more commercial farm buildings have been put to use for special amusement. This seminar helps inspectors understand the modifications needed to maintain safety when the use of a structure is changed from a basic agricultural building to one of assembly. Students will learn what is required for special amusement buildings and why they must be designed by using sections taken from several codes. This seminar includes several additional topics: membrane structures and their review for size of structure based on the type of materials and use; determining snow load compliance for structures to help do deck reviews; and finally, ways to determine a fire rating of a structural assembly in an existing structure. 0.5 CEU

Thurs, Apr 05 - Bergen Cty Law and Public Safety Institute, Mahwah
Fri, May 25 - RWJ Conference Center, Hamilton
B747
BUILDING INSPECTOR WORKSHOP - A COLLECTION OF HELPFUL TOOLS
Instructor: Jack Boekhout Consulting, LLC
Credit: building
A building inspector’s job encompasses a variety of duties, including plan review, inspection and working with the public, to name just a few. This course is designed to help the building inspector save time by using available tools, such as checklists, charts and high-tech equipment. In addition, participants are encouraged to share best practice ideas for mutual benefit. 0.5 CEU

Tues, Apr 10 - Camden Cty Educational Services Commission, Clementon
Fri, May 11 - Ocean Cty Fire and EMS Training Center, Waretown

D283
CHANGES TO DETERMINING HEIGHT AND AREA USING THE IBC 2015
Instructor: Jack Boekhout Consulting, LLC
Credit: building, fire protection
The method for determining allowable building size has changed extensively in the 2015 codes. Table 503 that was used previously has been replaced. Students will review the requirements for all Use Groups and Construction Types. In addition, students will discuss how to adjust the allowable size of structures using all of the information from tables 504, 506, 601 and 602 with adjustments available. Practice problems and practical solutions are also offered at this seminar. 0.5 CEU

Wed, Apr 11 - Camden Cty Educational Services Commission, Clementon
Tues, Apr 24 - Morris Cty Public Safety Training Academy, Parsippany

L067
NEW CODE UPDATE, ASME A17.1-2016
Instructor: NAESA
Credit: elevator
This seminar informs students of the current edition of ASME A17.1 by covering codes ASME A17.1-2016 Safety Code for Elevators and Escalators. Participants will review such code sections as definitions, electric elevator, hydraulic elevator, LULA, residential, escalator, engineering tests and type tests, maintenance, repair, replacement and testing, and acceptance testing. 0.5 CEU

Thurs, June 21 - Foundation for Educational Administration, Monroe

D315
NEW COMMERCIAL AND RESIDENTIAL HVAC AND HIGH EFFICIENCY VENT COMPLIANCE*
Instructor: Fritz Reuss
Credit: building, fire protection, plumbing, mechanical
This seminar provides a code compliance overview of HVAC systems (commercial and residential) and high efficiency vent installation requirements. Plan review and inspection protocols are evaluated regarding duct system compliance, minimum ventilation, flue venting compliance, outdoor air clearance criteria, etc. This seminar will strengthen the code official’s understanding of manufacturers’ installation requirements and specific HVAC code compliance. Specific examples and compliance scenarios are reviewed. 0.5 CEU

Thurs, Apr 05 - Grand Hotel, Cape May
Wed, June 06 - Executive Inn, Fairfield
Mon, June 11 - Online - Go To Training

E271
CONDUCTOR SIZING AND PROTECTION FOR ELECTRICAL INSTALLATIONS
Instructor: Constantinos Papademas LLC
Credit: electrical
The National Electrical Code requirements for conductor sizing and overcurrent protection can be a confusing and complex topic. A variety of code rules that modify the general requirements make the selection of a circuit conductor and over-current protection device challenging. This seminar provides steps and examples to understand the basic rules of conductor sizing and protection. Emphasis is placed on describing the types of conductor and overcurrent devices and their implementation in electrical systems. 0.5 CEU

Tues, May 15 - Rutgers Continuing Education Center at Atrium, Somerset
Tues, June 19 - The Inn at Lambertville Station, Lambertville

D222
ELEVATOR SAFETY SUBCODE REVISITED
Instructor: Richard Osworth
Credit: administrative, elevator
The Elevator Subcode was established by regulation in 1992 in response to continued concern for the safe operation of elevator devices and required building access. Since then the program has moved from ad hoc enforcement to a comprehensive ongoing inspection program. The seminar is designed to be a refresher course on the principles and practices of the elevator safety program. The elevator subcode has specific program procedures designed to bring together both new construction, changes and upgrades and maintenance programs in a manner that balances the need for building access while also assuring safe operation. The
elevator subcode official’s role and responsibilities differ from other subcodes and this seminar fully explores the unique attributes of the position. 0.5 CEU

Fri, May 11 - Clarion, Toms River
Fri, May 18 - Executive Inn, Fairfield

D323  NEW
ENERGY CODE FOR UCC SUBCODES
Instructor: Dennis Pino, Nick Fabiano, Fritz Reuss
Credit: building, electrical, plumbing
This seminar is designed to promote positive change by providing a complete overview of energy efficiency elements applicable to single-family R-5 type structures with detailed focus on assigned Subcode responsibilities for plan review and inspection. From permit application to certificate issuance, this seminar busts the myths, challenges misconceptions and provides facts. Included are permit and construction plan elements, compliance documentation, energy codes, code commentary and an overview of the rehabilitation subcode rules applicable to R-5 energy codes. 0.5 CEU

Thurs, May 10 - Holiday Inn, Budd Lake
Thurs, June 21 - Ocean Cty Fire and EMS Training Center, Waretown

D325  NEW
ENVIRONMENTAL CONCERNS & DEP REGULATORY PROGRAMS RELATED TO THE UNIFORM CONSTRUCTION CODE*
Instructor: Marie Daniels, DEP
Credit: administrative, hotel/multiple dwelling
This seminar provides an outline of potential environmental concerns (including mold, radon, lead, asbestos, and others) related to or addressed in the Uniform Construction Code and explains how these issues may be addressed. In addition, this seminar provides a general overview of the Department of Environmental Protection’s (DEP) regulatory programs and how DEP’s Office of Permit Coordination and Environmental Review can assist in identifying and facilitating permit determination for a new project. 0.5 CEU

Thurs, June 21 - Rutgers EcoComplex, Bordentown

F594  NEW
FIRE PROTECTION FOR HIGH PILED STORAGE OCCUPANCIES
Instructor: Fire Smarts, LLC
Credit: fire protection
High piled storage is one of the most challenging and often misapplied fire protection scenarios. This seminar is based on the provisions of both the International Fire Code, Chapter 32 and NFPA 13 Standard for the Installation of Sprinkler Systems and reviews the key decision points to determine the appropriate fire protection requirements for high piled storage applications. Utilizing an interactive teaching method, this seminar follows the path that an engineer, designer, or AHJ uses when evaluating high piled storage. The foundational questions of “What is high piled storage?”, “How does commodity classification impact the definition of high piled storage?”, “What triggers specific fire protection requirements for high piled storage?”, and “How is high piled storage fire protection provided?” are reviewed in detail. 0.5 CEU

Monday, March 26 - Online - Go To Training
NEW
FIRE SPRINKLER PLAN REVIEW
Instructor: Dave Kurasz, NJ Fire Sprinkler Advisory Board
Credit: fire protection
Examining fire sprinkler shop drawings, cut sheets and hydraulic calculations is a primary duty of the authority having jurisdiction. This seminar provides efficient method of reviewing plans and others fire sprinkler documents. Attendees will learn what documents to accept to start a review, what steps to take through the fire sprinkler design and systems review, and how to have confidence while reviewing hydraulic calculations. This seminar applies current codes and standards to fire sprinkler systems from the initial site plan review, through the construction documents, to the as-built drawings. Significant time is spent on how to effectively communicate deficiencies to the design professionals. Students will receive a handout that provides detailed checklists with expert commentary for the fire sprinkler plan reviewer. 0.5 CEU
Thurs, Apr 19 - Holiday Inn, Clinton
Fri, June 08 - Fire-Rescue Station 221, Evesham

FIVE STAR LEADERSHIP TRAINING
Instructor: Richard Perlman
Credit: administrative
Organizations rise and fall based on leadership. This seminar discusses new and time tested leadership techniques that can revolutionize a leader's influence. Topics include team building, vision casting, communication, priority setting and decision making. Attendees will be inspired and challenged through lecture, video and stimulating discussion. Seminar results will produce years of leadership success in dealing with staff, professionals and the general public. 0.5 CEU
Fri, Apr 20 - Fire-Rescue Station 221, Evesham
Fri, May 25 - NJ Sports & Exposition Authority, Environment Center, Lyndhurst

FRAMING CHECKLIST - 2015 IRC COMPLIANCE
Instructor: Dennis Pino, Nick Fabiano, Dennis Bott
Credit: building
This interactive seminar includes a step-by-step detailed review of the 2015 IRC codes, code change, commentary, standards and applicable UCC regulations through the use and review of the Framing Checklist requirements. Specific focus of manufactured wood products is also provided in great detail through a presentation by known industry representatives. Custom graphics and color enhanced code illustrations, including exclusive icons, bring the 2015 IRC Codes and Framing Checklist to life unlike any other compilation. Developed by Code Officials for Code Officials; a unique, interactive and challenging learning experience is provided from the sill plate to the ridge beam. 0.5 CEU
Thurs, Apr 26 - Camden Cty Regional Emergency Training Center, Blackwood
Fri, May 18 - Rutgers Continuing Education Center at Atrium, Somerset

FIRE SUBCODE - 2015 IRC RESPONSIBILITIES
Instructor: Dennis Pino, Nick Fabiano, Patrick Reardon
Credit: building, fire protection
There are well over 100 relevant code sections in the adopted 2015 IRC with specific enforcement responsibilities assigned to the Fire Subcode Official. In addition, there are over 150 references to applicable standards. This seminar presents the significant codes and key code changes. Topics include formal code commentary and a complete overview of R-5 plan review and inspection responsibilities produced for the NJ Fire Subcode Official that include high quality custom graphics with detailed focus on applicable UCC rules and regulations. 0.5 CEU
Thurs, Apr 19 - Holiday Inn, Clinton
Fri, June 08 - Fire-Rescue Station 221, Evesham

FIRE STOP INSPECTION 2018
Instructor: Sinisi Associates LLC
Credit: building, fire protection, electrical
This seminar, designed for the municipal, state and special inspectors in New Jersey, provides information on fire stop inspection and the new standards for inspection. Topics include fire barriers and the importance of fire stop during planning, construction and the useful life span of a building; penetration inspection and UL Tested System information for mechanical, electrical, sprinklers and plumbing installations; and fire and smoke rated barriers in all types of construction such as condominiums, multiple dwellings, electrical room protection and typical utility penetrations. This seminar also reviews fire stop as it is applied in the NJ Building Code. NFPA, ASTM and Best Practices for Inspection are also presented and reviewed. 0.5 CEU
Fri, Apr 20 - Fire-Rescue Station 221, Evesham
Fri, May 25 - NJ Sports & Exposition Authority, Environment Center, Lyndhurst

FRAMING INSPECTIONS - USING A CHECKLIST
Instructor: James Foran
Credit: building
ONE TIME mandatory requirement for Building Inspectors. This seminar provides the information necessary for a code enforcer to properly understand and use the Framing Checklist prepared by DCA. The student will learn proper techniques for framing with traditional and engineered wood products. Standards referenced in the UCC are reviewed and their application is illustrated. Special attention is given to engineered wood products. Particular areas of emphasis include wood installation requirements unique to wood I-Joists as well as proper installation and bracing of trusses in floors and roofs. 0.5 CEU
Fri, Apr 06 - Rutgers EcoComplex, Bordentown
Fri, June 08 - Rutgers Continuing Education Center at Atrium, Somerset

F595 NEW
FREEZE PROTECTION FOR WATER-BASED FIRE PROTECTION SYSTEMS
Instructor: Fire Smarts, LLC
Credit: fire protection
This seminar covers the NFPA standards requiring water-based fire protection systems to be protected against freezing. It exams the conditions that trigger mandatory freeze protection along with the approved options for meeting the requirement. The design limitations and economic impact (including maintenance) of using dry pipe systems, preaction systems, insulation, heat tracing, antifreeze solutions, and other potential protection methods is examined. Participants will learn to identify and apply the items needed to be considered when making a choice on how best to provide adequate protection. 0.5 CEU
Fri, May 18 - Online - Go To Training

D235 NEW
H USE GROUP BUILDINGS USING THE 2015 NJ IBC
Instructor: Jack Boekhout Consulting, LLC
Credit: building, fire protection
This seminar will address the differences between buildings of other use groups and the H use group. Students will discuss the exempt quantities of hazardous materials that are allowed in other use groups and when it is necessary to classify the building as an H use group building. Topics include grade plane, control areas on various story levels, and H use group specific code requirements such as exit access travel distance, exits, fire separation and ratings. H uses in unlimited area buildings are also outlined. 0.5 CEU
Thurs, May 31 - Middlesex Cty Fire Academy, Sayreville

D314 NEW
HANDLING WATER DAMAGED ELECTRICAL EQUIPMENT
Instructor: Stephen Norako
Credit: electrical, amusement rides
From residential areas to heavy-duty industrial facilities, damage caused by water, both fresh and salt water, is of major concern, especially with electrical equipment and wiring. If not properly identified and addressed, electrical equipment and wiring subject to water damage can result in fire, explosion, and even death. This seminar reviews the administration and enforcement activities as per N.J.A.C.5:23 Electrical Subcode. Participants will learn the concerns and methods of remediation recommended by the National Electrical Manufacturers Association, specific manufacturers, Underwriters Laboratories, IAEI and the NEC that will provide a guide to the electrical inspector when confronted with this matter. NEC 2014 updates and analysis of changes are also discussed where appropriate. 0.5 CEU
Thurs, May 10 - Ocean Cty Fire and EMS Training Center, Waretown
Wed, June 20 - The Inn at Lambertville Station, Lambertville

INSPECTING ELECTRICAL SERVICES AND EQUIPMENT
Instructor: Constantinos Papademas LLC
Credit: electrical
The NEC article 230 provides the requirements to supply power to a structure. Fixing code violations after installing electrical services and equipment can be very costly. This course enhances the code official’s knowledge of the requirements, as well as the updated changes of NEC 2014 as they relate to services, and service equipment at the plan review stage. 0.5 CEU

INTRODUCTION TO FIRE ALARM SYSTEMS*
Instructor: Fire Smarts, LLC
Credit: electric, fire protection, hotel/multiple dwelling
This seminar covers fire alarm system basics based on NFPA 72 National Fire Alarm and Signaling Code. An overview of fire alarm system components is provided starting with the fire alarm control panel and power supplies. Fire alarm initiating devices are discussed including smoke detectors, duct detectors, heat detectors, pull stations, tamper switches and water-flow switches. Fire alarm notification devices such as horns and strobes are also discussed along with a review of the fundamental requirements that apply to most fire alarm systems. The basics of fire alarm system design and items required for plan review are also covered. 0.5 CEU

Tues, March 27 - Cumberland Cty College Conference and Events Center, Vineland
Wed, Apr 25 - Foundation for Educational Administration, Monroe

INTRODUCTION TO SPECIAL HAZARD FIRE SUPPRESSION SYSTEMS
Instructor: Fire Smarts, LLC
Credit: fire protection
This seminar introduces the attendees to water and non-water based fire suppression systems, which are used as an option to standard sprinkler systems or where sprinkler systems are ineffective with the hazard. These systems include water-mist (NFPA 750), clean agents (NFPA 2001), high expansion foam (NFPA 11), and CO₂ (NFPA 12). Participants will receive an overview of how the systems work, the appropriate hazards, basic design criteria, and the advantages and disadvantages for each type of system. 0.5 CEU

Mon, June 04 - Online - Go To Training

D287 INTRODUCTION TO SPRINKLER SYSTEMS
Instructor: Fire Smarts, LLC
Credit: fire protection, hotel/multiple dwelling
This seminar is a high level overview on fire sprinkler systems, its history and objectives. The three required components for a sprinkler to function are examined: automatic sprinkler; water supply, and the connection (piping) between the two. In addition, this seminar covers the four major types of sprinkler systems and the associated components. Basic installation requirements are reviewed along with system acceptance. 0.5 CEU

Tues, Apr 10 - Hampton Inn, Denville
Thurs, June 28 - Atlantic Cape Community College, Rutgers Building Q, Mays Landing

MASONRY CODES AND CONSTRUCTION
Instructor: International Masonry Institute
Credit: building, special inspector (concrete)
This seminar is covering a variety of topics to familiarize participants with the codes that guide masonry construction. This seminar begins with code updates based on I-codes and referenced Building Code Requirements and Specification for Masonry Structures (also known as MSJC or TMS 402/602 or ACI 530/530.1 or ASCE 5/6). To better understand field practices of masonry contractors, special attention is given to job site troubleshooting and conditions for masonry projects. Time is also spent on cold weather provisions for masonry construction in NJ, flashing and moisture control for masonry. Finally, this seminar reviews different movement joints in masonry construction and how they function. 0.5 CEU

MIXED BAG - FIVE TOPICS IN 5 HOURS, THE SEQUEL*
Instructor: Tom Pernal Electrical Seminars, LLC
Credit: electrical
This seminar is a compilation of five topics useful for the purposes of installation, plan-review and inspection of a variety of occupancies. The topics to be discussed include feeder load calculations, parallel conductor installations, existing electrical installations and wiring for 1 & 2 family, requirements for appliances, and installation, substitution and inspection of LV cabling types. 0.5 CEU

Thurs, Apr 05 - Rutgers EcoComplex, Bordentown
Wed, June 27 - Holiday Inn, Hasbrouck Heights

D234 MIXED USES WITH EMPHASIS ON PARKING GARAGES USING THE 2015 IBC
Instructor: Jack Boekhout Consulting, LLC
Credit: building, fire protection
During this seminar, students will be made aware of some of the fine points of mixed use compliance with special emphasis on mixed uses with parking garages. Students will discuss the routine questions associated with the application of these provisions. Sample problems and solutions are provided. 0.5 CEU

Fri, June 01 - Middlesex Cty Fire Academy, Sayreville

D265 NAVIGATING THE UCC REHAB SUBCODE
Instructor: John Daniels
Credit: administrative, building
This seminar reviews all types of rehab work and is designed to enhance the participant’s existing knowledge and understanding of the rehab subcode. Participants will use actual projects to develop a methodical approach to navigating the rehab subcode and ensuring proper enforcement. The sections of the referenced codes that are applicable are also discussed. Participants should bring a current UCC administrative book to the seminar. 0.5 CEU

Thurs, Apr 12 - Camden Cty Educational Services Commission, Clementon
Wed, May 30 - Holiday Inn, Hasbrouck Heights
E289  New  NEC 2014 REQUIREMENTS FOR A COMPLETE PORTABLE AND FIXED EMERGENCY GENERATOR SYSTEM INSTALLATION FOR SINGLE FAMILY HOMES ON SAFETY AND RELIABILITY
Instructor: Stephen Norako
Credit: electrical
As the demand for emergency power increases, the safety concerns increase as well. Often considered a DIY item, homeowners can quickly put themselves in danger by using and installing emergency generators. This seminar reviews the NEC 2014 specific requirements of portable and fixed generator systems for a single family home, along with the required permit process, power transfer needs and types, fuel type, grounding criteria variables, capacity, ampacity, wiring, spacing, indication signs, exceptions, and proactive measures to promote a reliable and safe installation. 0.5 CEU
Fri, Apr 20 - Somerset Cty Emergency Services Training Academy, Hillsborough
Wed, May 23 - Grand Hotel, Cape May

E290  New  NEC 2014 WIRING AND EQUIPMENT REQUIREMENTS IN FLOODPLAIN LOCATIONS AND BUILDING TO THE REVISED FLOOD ELEVATIONS
Instructor: Stephen Norako
Credit: electrical
Severe flooding along coastal, river and lake regions have brought about floodplain changes that affect building construction in New Jersey. This seminar addresses NEC 2014 wiring and equipment requirements within flood hazard areas as directed by The American Society of Civil Engineers Flood Resistance Design ASCE/SEI 24-05. Special attention is given to the recent changes to Base Flood Elevation brought about by recent severe flooding. Participants will review different flood hazard categories and their requirements for materials, electrical wiring and electrical equipment, flood proofing, utilities, building access and miscellaneous construction. 0.5 CEU
Fri, Apr 13 - Hampton Inn, Denville
Fri, June 01 - Cumberland Cty College Conference and Events Center, Vineland

E155  NEC ARTICLE 220 - BRANCH CIRCUIT, FEEDER, AND SERVICE CALCULATIONS
Instructor: Tom Pernal Electrical Seminars, LLC
Credit: electrical
This seminar provides inspectors and design professionals with the knowledge to perform plan review, design, and inspection of branch circuit, feeder, and service installations. NEC Article 220 is the main source of content for this seminar. NEC Chapter 3 and 4 and other interrelated articles are also referenced and utilized for examples, sample calculations, and worksheets. 0.5 CEU

NFPA 13, NFPA 72 WITH IBC. ASME 17.1 FEO, FSAE AND OEO
Instructor: NAESA
Credit: fire protection, electrical, elevator
This fast pace interactive seminar takes the attendees through a brief history of NFPA 13 and 72, ASME A17.1 FEO, FSAE and OEO. Participants will discuss the NFPA's chapters as they refer to ASME A17.1 including installation and maintenance requirements of sprinklers and alarm initiating devises for elevators and escalators. Participants will also explore IBC and how it interacts with FEO, FSAE and OEO. 0.5 CEU
Tues, Apr 17 - Somerset Cty Emergency Services Training Academy, Hillsborough

D267 NEW
NFPA 20 - FIRE PUMPS - 2 DAY*
Instructor: Fire Smarts, LLC
Credit: fire protection, electrical
This seminar provides a detailed review of the design, installation, and acceptance testing of stationary fire pumps. The seminar begins with a review of basic pump principles including laminar and balanced flow along with basic hydraulic principles. The difference between centrifugal and positive displacement pumps is examined. The attendees will learn about the various types of centrifugal fire pumps and how each are best applied. Installation requirements are thoroughly reviewed with illustrations of acceptable and unacceptable layouts. The purpose of pressure maintenance (jockey) pumps is thoroughly examined including methods for choosing the correct capacity. The requirement for motor drivers, engine drivers, and their controllers is examined. Finally, the seminar covers the requirements for acceptance testing and the required documentation for an approved fire pump installation. 1.0 CEU

PREMANUFACTURED CONSTRUCTION - TODAY'S BUILDING TECHNOLOGY
Instructor: Richard Osworth
Credit: administrative
This seminar explores the law as it relates to premanufactured construction. Participants will discuss the ways in which the regulations allow for the acceptance of these systems while insuring compliance with the adopted national codes. The acceptance of building components or an entire building is based on the concept of quality control and quality assurance in the manufacturing process. The seminar focuses on the basics of quality control and assurance programs and the methods used to ensure that the product meets the code. The various premanufactured building programs controlled by federal, interstate and state jurisdictions are also presented. 0.5 CEU

PRESS TECHNOLOGY FOR METALLIC PIPING SYSTEMS
Instructor: Viega, LLC
Credit: plumbing, mechanical
This seminar covers the various types of press connection systems being utilized in today’s plumbing, mechanical, HVAC, and industrial installations. Included is copper tube size (CTS) press systems for liquid and gas, and iron pipe size (IPS) press systems for liquid and gas. The participants will learn about typical residential and commercial applications, installation best-practices, tooling, and pressure testing. Approvals, codes, and standards governing these systems are also covered during this seminar. Stainless steel press systems for liquid, gas, and other industrial type applications are addressed as well. This seminar also contrasts press technology to traditional methods of pipe joining. 0.5 CEU

THE ANNUAL PERMIT
Instructor: Richard Osworth
Credit: administrative
Local officials are always looking for ways to streamline processes, and local companies are looking for ways to be more effective and efficient. However, the annual permit process is a concept that is overlooked and not necessarily seen as a potential savings to all concerned. This seminar takes the participants through the UCC Act and Regulations with both a historic and current presentation of the annual permit process. The presentation fully explains the concept of a construction permit, its origins in the law and how it has been amended over time. The seminar focuses on the annual permit process with a full explanation of the approval process, the inspection process, the training requirements and the facility manager’s responsibilities. Participants will leave with a full understanding of the annual permit process including sample documents for potential clients. 0.5 CEU

Thurs, June 21 - The Inn at Lambertville Station, Lambertville

B784
THE IMPORTANCE OF WALL BRACING AND CONTINUOUS LOAD PATH IN THE 2015 NJ CODE
Instructor: Simpson Strong-Tie
Credit: building
This seminar will equip students with an understanding of the wall bracing provisions in the new 2015 IRC code. Students will review and understand appropriate braced wall panel and braced wall line information on plans submitted for permit, a requirement in the new code. This information will also allow students to identify and inspect braced wall panels and
continuous load path. Students will learn to identify common problem areas that are difficult to meet with the prescriptive code, including narrow garage door openings, window walls, and two-story balloon framed walls, and understand solutions for these problem areas. In addition, the situations that fall outside the prescriptive code by evaluating prefabricated shear wall solutions for those situations and the continuous load path provisions of the code that are directly related to wall bracing are discussed. 0.5 CEU

**A605**  
**THE UCC FOR NEWLY LICENSED OFFICIALS**  
Instructor: Brian Mitchell  
Credit: administrative  
Participants of this seminar will become familiar with, interpret, and review the most significant elements of the New Jersey Uniform Construction Code, administrative regulations, related codes, standards and regulations, and performance procedures to better prepare them for employment as a subcode official or inspector. This 5 hour seminar is comprised of two sessions, each 2.5 hour long. Participants have to attend both 2.5 hour evening sessions in order to obtain a credit. 0.5 CEU

Fri, May, 25 - Online - Go To Training

**A581**  
**THE UNIFORM CONSTRUCTION CODE ACT**  
Instructor: Richard Osworth  
Credit: administrative  
Building safety has been a major policy effort in New Jersey for decades. The Uniform Construction Code Act was passed in 1975 and was the first comprehensive building safety act in New Jersey. The implementation of the act began a movement to professionalize both the building industry, as well as municipal government's inspection staffs. This seminar presents the history of building safety through a presentation of the original act (what is in the law) and all of the subsequent amendments. The discussion addresses the legal underpinnings of all the regulations, codes and standards used in inspector's everyday work. This seminar is designed for new code officials and seasoned veterans, as it discusses the true meaning of law and the authority upon which the enforcement of a uniform construction code is based. 0.5 CEU

Fri, May 25 - Online - Go To Training

**E229 (pending) NEW**  
**TOP REASONS FOR NON APPROVAL IN ELECTRICAL PLAN REVIEW AND INSPECTION**  
Instructor: Richard Napier  
Credit: electrical  
The goal of this seminar is to identify several of the most common violations of the codes enforced by the electrical subcode including the NEC, IECC, IRC, IFGC, and UCC to help electrical subcode officials in their plan review and inspections. 0.5 CEU

Thurs, June 07 - Executive Inn, Fairfield  
Fri, June 15 - Monmouth Cty Fire Academy, Freehold
**D318** NEW TRANSFORMER, GENERATORS, FUEL STORAGE, CRITICAL EQUIPMENT AND ELECTRICAL CONTAINMENT 2018
Instructor: Sinisi Associates LLC
Credit: building, fire protection, electrical
This seminar delivers up to date education on inspection of protection of transformers, electrical power, generators and equipment and fuel storage containment areas. Many of today’s buildings, hotels, multi-family dwellings, schools, long term care and assisted living and campuses are equipped with new uninterrupted power suppliers, generators, battery banks, transformers, fuel storage and special emergency equipment and electrical rooms. There are also many new substations in NJ communities. This seminar focuses on protection, containment and separation to provide protection and resilience. The program incorporates a mix of education on inspection of new materials, transformer rooms, and dampers/doors/stops/smoke. 0.5 CEU
